Bondloc B7063 Solvent Cleaner

PRODUCT DESCRIPTION

B7063 is used for the cleaning of components prior to bonding, depositing a correct balance of neutralising ions on the surface, stimulating attraction for the adhesive and preparing the surface for bonding.

APPLICATIONS

B7063 is primarily designed for the preparation of the interface layer. B7063 cleans and mildly primes, preventing poor wetting by the adhesive, absorption of the lower viscosity super glues into porous items. B7063 helps also with anaerobic formulations being compatible with its cure system and similarly attracting adhesion on the parts.

USEFUL NOTES

Fast drying B7063 grade is a blend of flammable solvents. Care must be taken to avoid naked flames. B7063 has the ability to reduce odours and blooming due to rapid polymerisation.
